

# Product Information ASB -100

The Rogers ASB-100 is an active subwoofer system housing a high power amplifier driving a ten-inch woofer that is capable of producing a low level frequency performance at high sound pressure level. The ASB-100's high level of performance is also extremely versatile enabling it to complement not only Rogers speaker systems but many other smaller satellite systems also. The extra sense of power and dynamics that the system conveys in high impact movies such as Saving Private Ryan or Gladiator greatly enhances the performance and therefore your enjoyment of the film.

## SPECIFICATIONS

<b>Power Amplifier:</b>	100W RMS (8 ohms)
<b>Frequency Response:</b>	30Hz-200Hz+/-3dB
<b>Crossover:</b>	50Hz-150Hz (variable)
<b>Crossover Slope:</b>	12dB per Octave
<b>Driver Unit:</b>	254mm Long Throw
<b>Function:</b>	Power (On, Auto, Off) Phase (0, 180 degree) Level Controller Crossover Frequency Controller
<b>Inputs:</b>	Hi Level (Speaker) In Line (RCA) In
<b>Power Consumption:</b>	230V 180W
<b>Cabinet:</b>	Stage Maple
<b>Dimension (WxHxD):</b>	290 x 335 x 325 mm
<b>Weight:</b>	12 kg (Net)
