

Product Information

ASB-120

As an up-grade version of Rogers Active Subwoofer (ASB series), design of ASB-120 originates from the excellent engineering capacity of Rogers, with more than 50 years history in production of high-end audio equipment. ASB-120 is a bi-polar active subwoofer system housing a high power amplifier driving two units of 12 inches drive unit to produce 120W (R.M.S.) power of low level frequency performance at sound pressure level. The extra sense of power and dynamics that the system conveys in high impact Dolby Digital or dts sound track recorded movies makes you have a realistic enjoyment in the home theatre.

SPECIFICATIONS

<i>Frequency Response :</i>	25Hz-200Hz +/-3 dB
<i>Drive Unit :</i>	304mm long throw
<i>Crossover :</i>	40Hz - 160Hz (variable)
<i>Crossover Slope :</i>	85dB per Octave
<i>Power Amplifier :</i>	120Watts RMS (8 ohm s)
<i>Cabinet :</i>	Stage Maple
<i>Features :</i>	Power (On, auto, Off) Phase (0, 180 degree) Level Controller Crossover Frequency Controller
<i>Inputs :</i>	Hi Level (Speaker) In Line (RCA) In
<i>Power Consumption :</i>	230V 180W
<i>Net Weight :</i>	21kg
<i>Dimensions (WxHxD) :</i>	410mm x 415mm x 445mm
